**What I Eat Depends on My Mouth!**

## Toothed Whales

Toothed whales eat fish and squid. Toothed whales chase the fish and squid and when they catch them they swallow them up in one big gulp!

## Baleen Whales

Baleen whales eat very small floating animals called plankton and krill. Krill are like tiny shrimp-like creatures. Water and krill wash through the whale's mouth. Water runs out through the baleen, but the krill stay trapped inside. Baleen whales also eat tiny fish.
